

Importance of *Recovery Care Insurance*

An unexpected illness or injury requiring temporary confinement for recuperation or rehabilitation could have damaging effects on your finances.

- » **NURSING FACILITY CARE**
- » **ASSISTED LIVING FACILITY CARE**
- » **HOME HEALTH CARE**
- » **ADULT DAY CARE**
- » **HOSPICE CARE**

WE'RE HERE FOR YOU.

Recovery Care is a good alternative if you cannot afford, qualify or see the need for Long Term Care Insurance (LTCi). It can also help cover your LTCi Elimination Period.

Because Medicare doesn't cover all cases requiring temporary confinement, your family could be left with the burden. In some cases, loved ones are forced to move, miss work or change their personal lives to become caregivers. Ask yourself these questions:

- Do I have a plan in place if I should need recovery care?
- Do I have the money to cover my plan?
- Would I have to use my savings or borrow money?
